

Restaurant Landing Page – Project Report

Project 2: Restaurant Landing Page

1. Project Overview

This project involves designing a visually appealing single-page landing site for a fictional restaurant. The page highlights the restaurant's menu, ambiance, and contact details, providing an engaging first impression for visitors. The design implements thematic branding with warm color tones, high-quality images, and modern layout techniques using Flexbox and Grid in CSS.

2. Objectives

- Design a one-page restaurant website highlighting menu and contact details.
- Practice using HTML layout techniques to create a visually appealing page.
- Implement thematic branding using typography and food-related imagery.
- Apply hover effects for menu items to enhance user interaction.

3. Expected Outcomes

- Ability to structure and design a single-page business website.
- Skills in arranging image-rich sections using CSS Grid/Flexbox.
- Familiarity with hover effects, contact icons, and footer layout.
- Understanding of how to align design with brand identity.

4. Design Sections

4.1 Header – Displays the restaurant name and navigation menu (Home, Menu, About, Contact). Fixed at the top for easy navigation.

4.2 Hero Image – Large background image showing food or restaurant interior. Welcome text and tagline in the center.

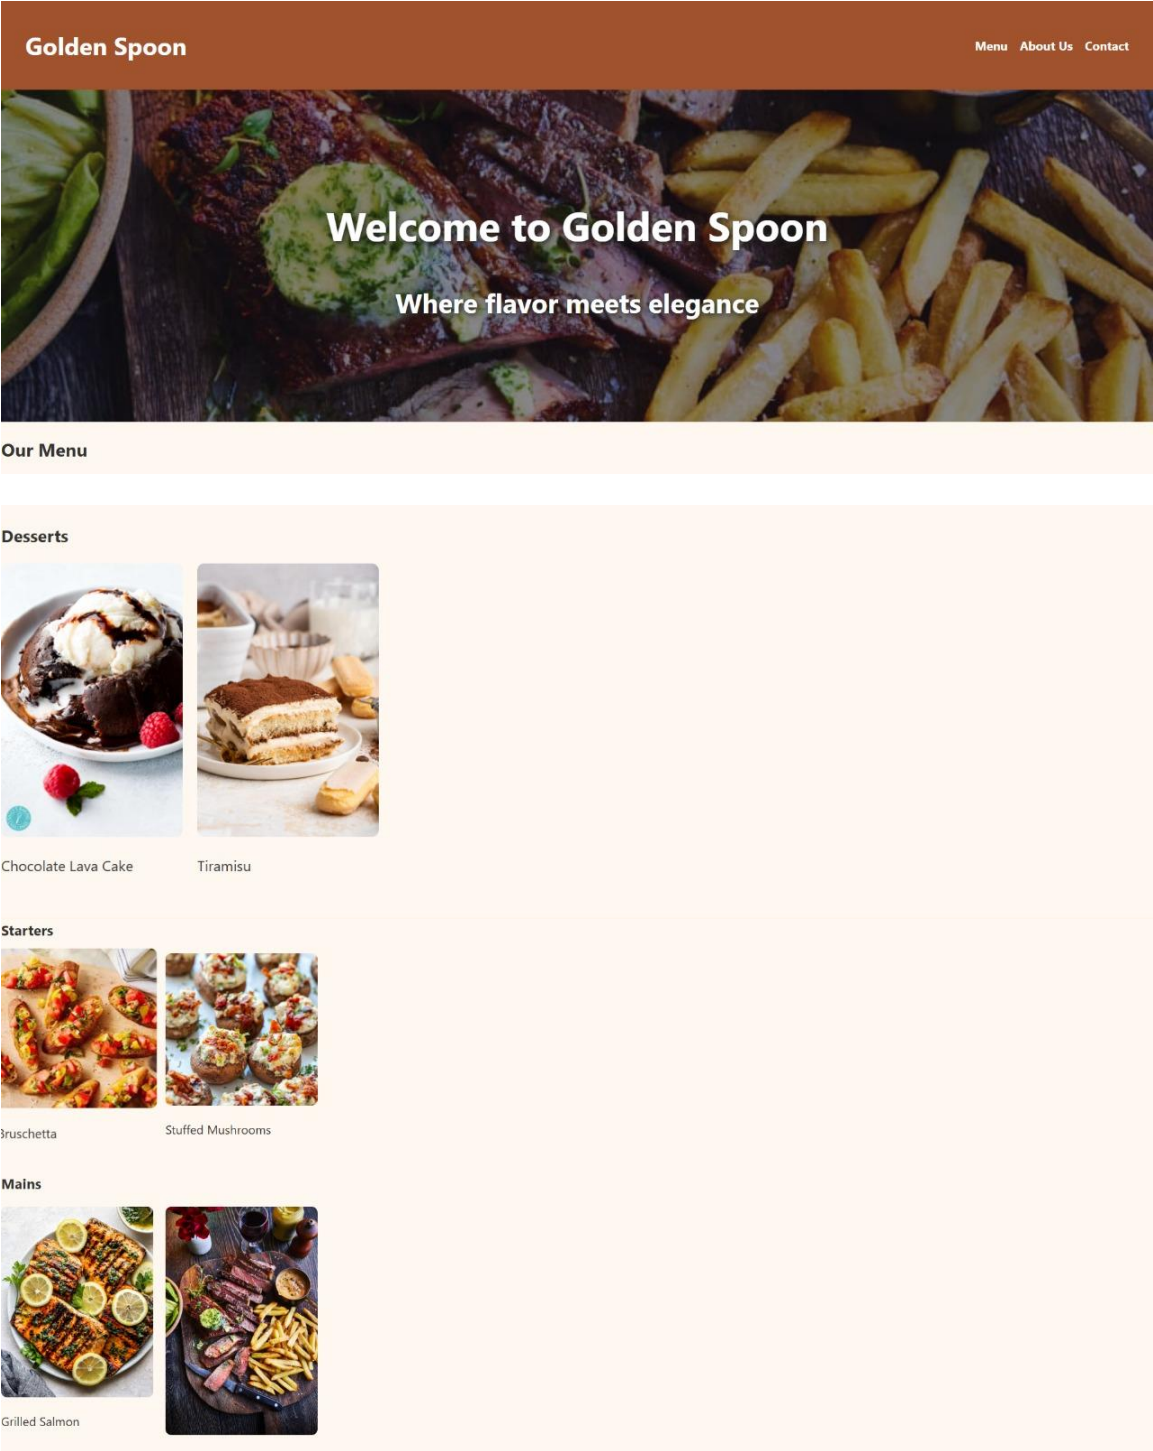

4.3 Menu – Divided into three categories: Starters, Mains, Desserts. Each item displayed as a card with image, name, and price. Hover effect: slight zoom-in with shadow.

4.4 About Us – Short paragraph describing the restaurant's history or specialty. Side-by-side layout with an image using Flexbox.

4.5 Contact – Address, phone, email, and opening hours. Icons for each detail using Font Awesome.

4.6 Footer – Social media links. Newsletter subscription placeholder.
