Project 1: Movie Info Page

Project Overview

The Movie Info Page is a single-page, visually rich website dedicated to a selected favorite movie. It contains essential details such as the title, genre, release year, synopsis, cast, reviews, and streaming platforms. The design is inspired by the theme of the movie, with appropriate background images, colors, and fonts to immerse the user in the cinematic atmosphere.

Objectives

- Develop a movie-themed single-page website that visually reflects the movie's genre.
- Practice multimedia integration and CSS-based visual effects.
- Organize visual and textual content in an engaging and structured manner.

Expected Outcomes

- Ability to create a thematic design using background images, overlays, and dark mode themes.
- Competence in using CSS for visual aesthetics (e.g., star ratings, shadows).
- Understanding of layout flow using Flexbox/Grid for the cast and review sections.
- Skills in organizing multimedia content for storytelling purposes.

Design Sections

- Header – Displays the movie title, genre, and release year.
- Banner Section – Full-width background featuring the movie poster.
- Synopsis – A concise 2–3 paragraph plot description.
- Cast – A grid layout with actor images and character roles.
- Reviews – Two to three user reviews with star ratings.
- Where to Watch – Lists available streaming platforms.
- Footer – Studio logo and copyright.

Design Guidelines Followed

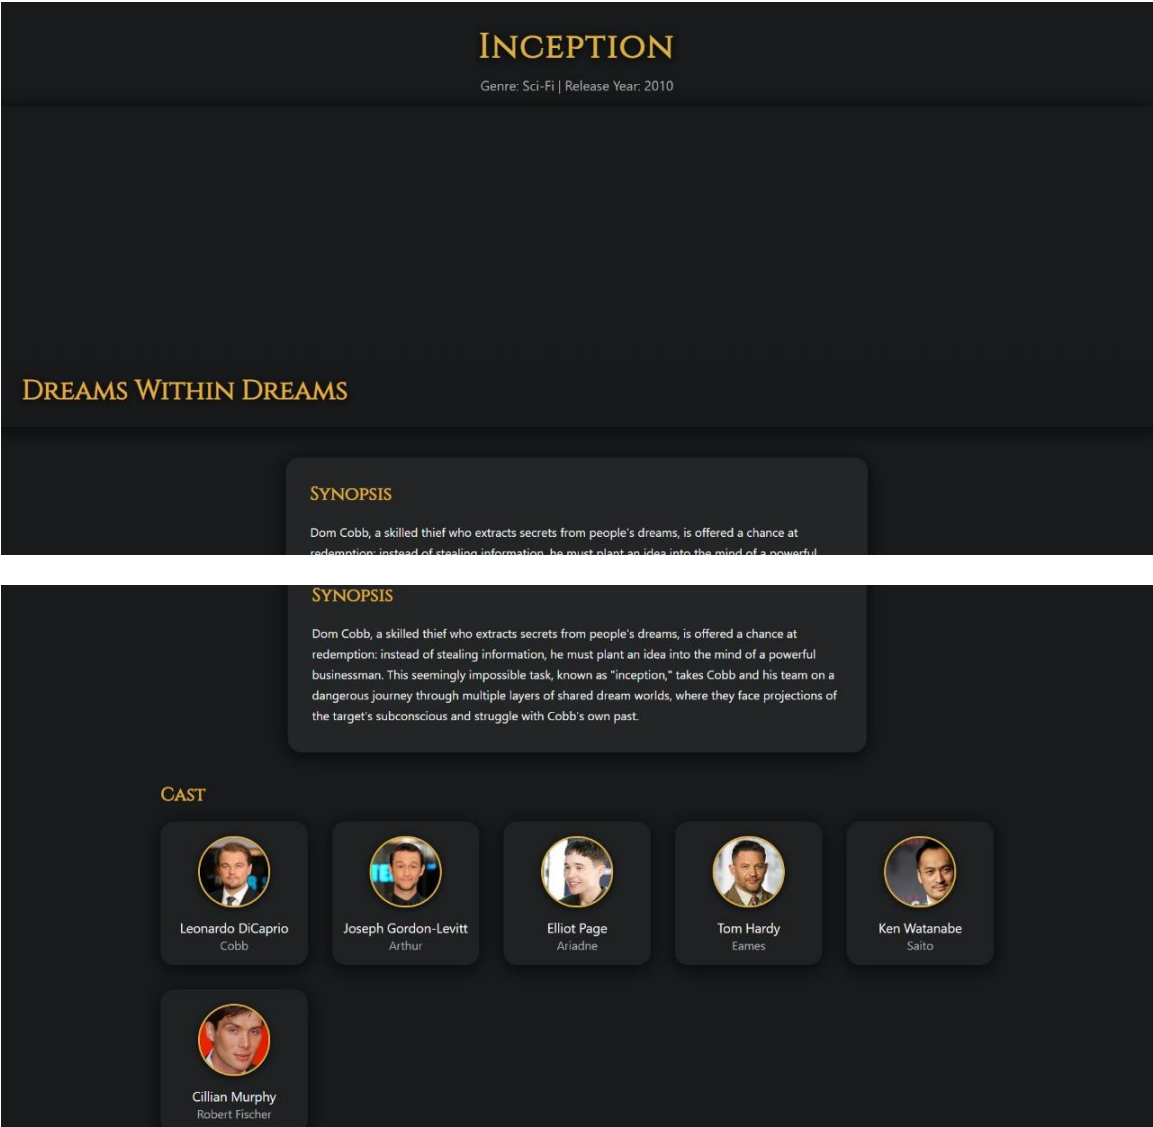

- Dark/cinematic color palette for immersive experience.
- Google Fonts selected to replicate movie poster typography.
- Rounded cards for cast and review sections for visual appeal.
- CSS shadows and hover effects for interactive elements.

Technical Implementation

- HTML5 for structured content organization.
- CSS3 for styling, including Flexbox/Grid for the cast section.
- Responsive Design to ensure the webpage works across devices.

- Multimedia Integration for images, fonts, and design elements.
